Drs. R. V. Stone, Jr. and W. Letko
National Aeronautics and Space Administration
Langley Field, Virginia

Dear Drs. Stone and Letko:

Richard S. Young, Chief of Environmental Biology for NASA at the Ames Research Center, Moffett Field, California, has informed me that you have issued a report under the auspices of NASA entitled "Weightlessness Simulator." He has suggested that I might get a copy of this report by writing you. I have been much interested in this matter for some years, as you may see by the enclosed reprint of an article of mine that appeared in Science in 1958.

I should very much appreciate it if you would send me a copy of this article, as well as of any others of your articles in this field that may still be available.

Yours sincerely,

LJH:alh
